POLYCAB
PROFESSIONAL LIGHTING SOLUTION

POLYCAB

About Polycab India Limited

Polycab is engaged in the business of manufacturing and selling wires and cables and fast moving electrical goods 'FMEG' under the 'POLYCAB' brand. Apart from wires and cables, we manufacture and sell FMEG products such as electric fans, LED lighting and luminaires, switches and switchgear, solar products and conduits & accessories.

Our promoters collectively have more than four decades of experience among them. Our company was incorporated as 'Polycab Wires Private Limited' on January 10, 1996 at Mumbai as a private limited company under the Companies Act, 1956.

We manufacture and sell a diverse range of wires and cables and our key products in the wires and cables segment are power cables, control cables, instrumentation cables, solar cables, building wires, flexible cables, flexible/single multi core cables, communication cables and others including welding cables, submersible flat and round cables, rubber cables, overhead conductors, railway signaling cables, specialty cables and green wires. In 2009, we diversified into the engineering, procurement and construction 'EPC' business, which includes the design, engineering, supply, execution and commissioning of power distribution and rural electrification projects. In 2014, we diversified into the FMEG segment and our key FMEG products are professional lighting, switches and switchgear and conduits & accessories.

POLYCAB

LED Luminaire Business

Polycab India limited is leading electrical brand in India, has diversified its portfolio beyond wire and cables into various verticals including lighting and luminaires. The Polycab professional lighting business focuses on providing innovative, energy-efficient and aesthetically appealing lighting solutions for commercial, residential, industrial and outdoor applications with the collaborations with builders, architects, consultants and specifiers for large scale projects and involved in end-to-end solutions all government projects, public infrastructure and smart city initiatives with the widespread network of dealer and distributors.

We offer you complete LED lighting solutions – for all types outdoor, indoor commercial, and industrial applications to match your need and designed using high quality materials. Our product solution provides high efficiency performance along with durability. Each product is designed to complement and co-ordinate the most exclusive interior and exterior lifestyles, from classic to contemporary. We are committed to offering the widest range of energy efficient LED lighting solutions coupled with latest technology, service, and expertise. We have in-house manufacturing facilities to produce indoor LED products, electronic drivers and outdoor LED luminaires.

Our Strength

Research & Development

Our research and development 'R&D' capabilities, emphasis on upgrading the technology used in our production process & customer-centric solution. Our R&D center is located in Halol, assist our sales and marketing team in understanding our customers' requirements and ability provide immediate custom based solution. Our lab is NABL accredited approved and well established with new technology based testing instruments.

Polycab Lighting

offers efficiency, design and performance

Polycab's indoor LED solution product provides the perfect blend of form and function. Don't miss out on the opportunity to transform your space with the latest in lighting technology which is helpful in

- Enhance productivity with superior light quality
- Maintain a comfortable indoor ambient by reducing the heat emission.
- Significant cost saving by reducing the energy bills.
- Smart integration by offering advance control systems.

Indoor Commercial Lighting Solutions

Indoor commercial lighting is a critical aspect of commercial spaces, influencing not only the ambiance but also the productivity, safety, and overall experience for the users. Selecting the right lighting solution requires an understanding of the specific needs of the environment, including aesthetics, functionality, and energy efficiency. Whether you are designing a new office, upgrading the retail space or enhancing a hospitality venue, Our Indoor commercial lighting solutions provide the perfect blend of efficiency, style and functionality.

Polycab brings you innovative indoor commercial lighting solutions designed to transform your workspace. Our range of energy efficient, aesthetically pleasing, and durable lighting products ensures superior illumination, enhanced productivity, and long-term savings.

POLYCAB linear profile suspended

Polycab's new suspended linear profile lighting is an excellent choice for both functionally and style to various settings, enhancing the overall design while providing effective illumination.

Modern aesthetics

Finished with powder coated extruded aluminum housing.

Customizable designs

Option available in different length and continues installation.

Formations and EoE connectivity

Multiple arm designs with different lengths and angle options.

Uniform light distribution

Excellent diffuser quality to reduce glare with identical light distribution.

Adjustable suspension system

To provide freedom and flexibility to decide the right mounting level and quick installation.

POLYCAB linear profile recess

Polycab's recess mounted linear profile lighting is an excellent choice to achieve modern interior. Asthetically well designed to be installed within the differing types of ceiling like gypsum, PoP or grid to create a sleek integrated look.

Flush design

Superior aesthetics with brilliant engineering according to modern interiors.

Customizable solution

Option available in 4ft and 8ft length standalone and continues installation.

EoE connectivity

Straight connector with accessories for seamless integration and zero light leakage.

Superior aesthetics

Good finish with powder coated extruded aluminum housing with spring loaded clamps.

Easy installation and maintenance

High graded clamps for neatly installation and easy driver access without disturbing product alignment.

Full glow troffer recess mounted

In the dynamic landscape of commercial lighting the square 2ft x 2ft troffer stand out as ideal choice for spaces that demand both efficiency and style in a compact form. Polycab's new 2ft x 2ft troffer offers unmatched performance, flexibility and visual comfort which can enhance the interior design.

Soft and highly efficient diffuser

Protect from unwanted glare and provide visual comfort atmosphere.

Uniform and optimum illumination

Better light distribution with wide angle spread to cover each corner of interiors.

Ensuring the building standards

To maintain the standards following the government mandate.

Perfect balance of form, function and efficiency

Eco-sustainability, design & innovation, green technology and efficient lighting solution.

Backlit downlight recess mounted

Lighting plays a crucial role in setting the mood and enhancing the functionality of any space. Our backlit downlights not only provide superior illumination but also elevate the aesthetic appeal of your environment, with a focus on energy efficiency and modern design, these fixtures are perfect for both residential and commercial settings.

Soft diffused lighting

Ensure to deliver excellent performance with wide distribution.

Perfect for refurbishment

Retrofit design allows for quick and straight forward installation in existing ceiling cutouts.

Comply to building standards

High grade aluminum pressure die casting ensures the better thermal management and long life.

Glare control optics

Provides a warm and inviting glow, enhancing ambience without harsh shadows and help to reduce the glare.

Edgelit downlight recess mounted

Polycab's newly designed edge lit panels offer a stylish and functional lighting solution, making them perfect for a variety of applications while supporting sustainability and energy efficiency. Best solution for a range of environments, from offices and retail spaces to homes and schools.

Stylish and appealing design

Edge-lit technology ensures consistent lighting without hotspots or glare.

Design flexibility

Ideal for diverse settings and applications with round and square shapes.

Eco friendly solution

Ensure to provide well-illuminated spaces in a greener and sustainable way.

Energy efficient

Uses significantly less energy compared to traditional lighting solutions.

Perfect for modern ceiling

Ultra-slim profile ensure to easy fit in low height ceiling and enhance the visual appeal of any space.

Industrial Lighting

The industrial lighting sector is evolving rapidly, driven by technological advancements, sustainability goals, and the need for efficiency. The trend in industrial lighting is centered around efficiency, safety, adaptability and sustainability. Innovations in LED technology, smart lighting systems and initiatives are reshaping the industrial segments.

Polycab's industrial segment lighting solutions are engineered to meet the demanding requirements of industrial environments. These lighting products are designed for high efficiency, durability, and safety, ensuring optimal performance even in harsh conditions. Ideal for factories, warehouses, and heavy-duty workspaces, Polycab's industrial lighting provides robust illumination that enhances productivity and safety. Built with cutting-edge technology and adhering to strict quality standards, these luminaires offer reliable, energy-efficient lighting tailored for industrial applications.

LED highbay (Power, efficiency and durability)

Maximise efficiency and safety of your industrial space with our new LED, highbay best suitable solution for high-ceiling environments that demand efficient and reliable illumination.

Highly efficient

Superior brightness and performance with the system efficacy of 150lm/w.

Controlled glare optics

Ensure optimal visibility and uniform light distribution from higher heights with low glare illumination.

Excellent thermal management

Designed to dissipate the heat through housing will ensure excellent thermal management.

Robust design

Constructed and built to withstand tough industrial conditions including high temperature up to 55 Deg.

Reliable and durable

Reliable and long-life span to reduce the maintenance cycle with extended operational life.

POLYCAB indeco Neo

LED highbay (Power, efficiency and durability)

Maximise efficiency and safety of your industrial space with our new LED, highbay best suitable solution for high-ceiling environments that demand efficient and reliable illumination.

Highly efficient

Superior brightness and performance with the system efficacy of 110lm/w.

Controlled glare optics

Ensure optimal visibility and uniform light distribution from higher heights with low glare illumination.

Excellent thermal management

Designed to dissipate the heat through housing will ensure excellent thermal management.

Robust design

Constructed and built to withstand tough industrial conditions including high temperature up to 55 Deg.

Reliable and durable

Reliable and long-life span to reduce the maintenance cycle with extended operational life.

≥ 110 lm/w

THD ≤ 10%

Life 50,000 burning hours

Polycab LED well glass

Superior light quality

Excellent brightness with the system efficacy of 100lm/w to provide optimum illumination.

Durability

Robust design and construction built to withstand through rugged industrial conditions including high temperature up to 55 Deg.

Ease of mounting

Providing i-bolt with safety wire for easy installation and maintenance.

Excellent thermal management

Specially designed heat sink to provide smooth operation in harsh environments.

Stout LED pit light

Robust brightness meets operational and industrial safety eliminate hazards and ensure a well-lit path to safer work conditions.

3 Way light distribution

To Provide for wider coverage with high visibility.

Robust design with longevity

Sustainable waterproof and dustproof product construction to ensure long life functionality.

Ease of mounting

Providing Eye bolt with safety wire for easy installation and maintenance.

Flexibility and versatile model

Available in 24V DC, 110V DC and 48V AC with different wattage options.

POLYCAB Indiray IP 66 LED batten

Polycab's newly introduced IP 66 batten Indiray is built to deliver high-performance illumination in challenging environments and fully protected against dust and water jets ensuring consistent performance in both indoor and semi outdoor applications.

Uniform and powerful illumination

Highly efficient LED module with excellent optics, to ensure optimum distribution and uniformity.

Stylish and compact design

Perfectly designed for large spaces as well specific task areas.

Ensuring long term reliability and durability

Made with durable polycarbonate housing improving performance and extended the product life.

Corrosion proof

Maintain the appearance and functionality even in challenging environments.

Flame Proof Lighting

The flame proof lighting industry is advancing rapidly, driven by technological progress, strict safety regulations, and the demand for energy-efficient solutions. Modern trends emphasize explosion protection, reliability, adaptability, and sustainability. Innovations in LED technology, smart monitoring, and energy-saving designs are transforming lighting solutions for hazardous environments.

Polycab's flame proof luminaires designed to withstand challenging industrial conditions, flame proof lighting solutions ensure efficiency, durability, and safety in explosive atmospheres. These luminaires are ideal for industries dealing with flammable gases, vapors, and dust, providing secure, explosion-proof illumination that enhances workplace safety and regulatory compliance. Engineered with advanced technology and adhering to strict quality standards, these lighting solutions offer long-lasting, energy-efficient performance for hazardous applications.

LED flame proof well glass

Our flame proof lighting for maximum durability, safety and compliance, making them the ideal choice for industries where flammable gases, dust and vapors are a constant concerns.

Explosion proof enclosure

Designed to contain any internal sparks and explosions and withstand harsh environment.

Temperature and pressure resistance

Ensure to perform reliably across a wide temperature range and pressure changes.

Certified safety standards and certificates

Meets the safety standards and certification such as PESO and CIMFR.

Anti vibration design

Resistance to vibrations, ensuring stable, reliable performance in heavy machinery movements.

Street Lighting

Street light solutions can help cities become more sustainable by shrinking their carbon footprint. Polycab's new cutting-edge street light design, with energy efficient LED technology and smart connectivity solution for optimal illumination in order to cut the energy cost and longer life span. It will help to make public infrastructure more versatile, flexible and efficient.

Upgrade your city roads and community's lighting infrastructure with Polycab newly designed streetlight for a brighter and smarter future.

- Ensure optimal visibility to create safer environment.
- Meticulously designed for urban and rural aesthetics.
- Helps to minimize carbon footprints
- Modern, resilient and environmentally conscious solution.

Citishine Pro

Superior light output

Advanced LED technology delivers over 135lm/w with high pole spacing coverage with optimum spread.

Specialised optics with high quality lens

Identically distributed illumination with visually comfortable environment for vehicle drivers and pedestrians without excess brightness.

Built to last

With the lifespan of 75000 Hr hrs. with external thermal management to reduce maintenance and reduce disruptions.

Engineered for all environments

More durable housing to with weather resistance and ruggedly built to sustain for long time in extreme weather environment.

Safer, smarter and sustainable

Engineered to provide powerful performance, reduce energy cost and improve reliability.

NOTE: Ensure proper earthing at each street light during installation point to be avoid warranty voids.

Citirays V3

Efficient and sustainable solution

Best solution to provide cities, municipal corporations, gram panchayats, and business to meet modern demands.

Uniform light distribution

Specially designed optics for optimum light distribution enhance the night time security to reduce accidents.

Proper heat management

High quality die cast aluminum body with fins to ensure better heat dissipation and reduce risk of over-heating.

Ease of maintenance

With the lifespan of 50000 Hr hrs. with better thermal management to reduce maintenance and disruptions.

Area Lighting

Area flood light is a powerful, broad beamed light typically used to illuminate larger areas. It is designed to provide a wide and even distribution of light, making it ideal for outdoor areas such as sport fields, parking lots, building exteriors, construction sites, outdoor and indoor sports activities.

Polycab's area lighting solutions are crafted to provide comprehensive and efficient illumination for large outdoor spaces such as parking lots, parks, sports complexes, and public areas. Designed for durability and high performance, these lights offer powerful brightness, ensuring safety and visibility across vast areas. Utilizing advanced LED technology, Polycab's area lights are energy-efficient and require minimal maintenance, making them an ideal choice for both urban and industrial applications. With a focus on reliability and long-term performance, Polycab's area lighting ensures well-lit spaces that enhance both functionality and security.

POLYCAB Eco LED flood light

Energy efficient & sustainable solution

Optimised to deliver high illumination to achieve greater brightness with less power consumption.

Durable and weather resistance

Constructed and built to withstand tough weather conditions including high temperature up to 60 Deg.

Optimised light distribution

Wide beam angle provides broad and uniform illumination, perfect for large areas while minimizing light pollution.

Safety and reliability

Offering open –shot circuit protection with surge protection device making more resilient and safer.

Citibeam LED flood light

High brightness and coverage

Designed with highly efficient LED modules to deliver 120lm/w and uniform illumination to cover larger space.

Precision optics for focus and wide distribution

Advanced lens optics allow for customized beam angles, allowing illumination according to different application.

Long operational life span

High wattages with quality, and thermally efficient components manage heat management to ensure higher life.

Ease of installation and maintenance

Flexible mounting bracket with adjustable angle for precise light direction and separate driver compartment for easy maintenance.

Landscape Lighting

Polycab's landscape lighting solutions are designed to enhance the beauty and functionality of outdoor spaces such as gardens, pathways, parks, and residential landscapes. These lights not only highlight the aesthetic features of your environment but also provide essential illumination for safety and convenience. With a variety of stylish and durable options, Polycab's landscape lighting blends seamlessly into any setting, offering energy-efficient and long-lasting performance. Whether for accent lighting, pathway illumination, or creating ambiance, Polycab's landscape lighting solutions bring your outdoor spaces to life with elegance and reliability.

Cylindrical shape LED bollard

A simple and sleek in design and uniform curves with functional appearance making it popular choice in all kind of commercial and residential landscape spaces.

360 Degree Illumination

Provides omnidirectional lighting to illuminating pathways, gardens, and public spaces.

Engineered for all environments

Durable housing to stand with weather resistance and built to sustain for long time in extreme weather environment.

Wide application appeal

Contemporary design makes it ideal for the added beautification of urban and upscale setups.

Post Top Lantern

Polycab's new range of post top luminaires are ultimate blend of functionality, design and sustainability, provides with tailored made product solutions for growing urbanization and well-lit advanced and expanding cities with the availability in modern, classic and heritage designs suitable for all type of architectural style.

Ring shaped LED post top lantern

A ring shaped dome inspired design product balanced light distribution to minimize glare and creates a welcoming environment. A perfect combination of functionality every efficiency, and contemporary design to illuminate urban , residential and commercial spaces to enhance safety, aesthetics and sustainability.

Modern and elegant

Well finished versatile product design and lighting solution complements contemporary architectural and landscape design.

Low maintenance

Durable materials and long-lasting LED technology minimize maintenance costs and efforts.

Wide application appeal

Contemporary design makes it ideal for the added beautification of urban and upscale setups.

Architecture Facade Lighting

An architectural facade refers to the exterior face or frontage of a building, often designed to make a visual statement or serve a functional purpose. It plays a crucial role in how a building interacts with its environment, both aesthetically and structurally. Architecture facade can be designed in many different styles, materials, and configurations depending on factors like climate, cultural context, location and the function of the building.

We understand that every building plays a role in shaping the character of a city. Our facade lighting product solutions are designed to enhance the beauty of your architecture while contributing to the overall beautification of the urban landscape. Whether you're developing a new district, refreshing a historic area, or simply improving a building's exterior, our team works with you to create lighting that complements the city's vision.

Our curated collection of architectural facade lighting is not only designed to transform individual buildings but also to elevate the entire cityscape. Whether you're illuminating a corporate headquarters, cultural landmark, or public space, our lighting solutions enhance both the beauty of your building and contribute to the overall beautification of the city. The impact of facade lighting on a building as well as its broader effect on urban spaces, creating a sense of community and citywide beautification.

Indiray Pro linear wall washer

Linear wall washer is a type of architectural lighting used to illuminate building exteriors, creating uniform brightness across surfaces. Polycab offering newly designed with the wide beam angle to "wash" walls with light, enhancing the building's aesthetics, visibility, and security.

Architectural aesthetics

Sleek, modern, and minimalistic designs to complement buildings.

Even illumination

Provides a smooth and consistent lighting effect.

RGB/RGBW/Dynamic white

Adjustable color temperatures for different moods and applications.

Optical control

Various beam angles (narrow, medium, wide) for precise lighting.

Customizable fixtures

Tailor-made shapes, sizes, and finishes to match project needs.

Life 50,000 burning hours

IP 66 rating

IK 08

Operating voltage options 24V DC/240V AC

CCT output 2700K-6500K, RGB, RGBW

Length available 1000mm, 600mm & 300mm

Bridges & monuments

Urban landscapes & public spaces

Building facades

Commercial & hospitality exteriors

Indiray deep linear wall washer

A linear wall washer with a lens is a high-performance architectural lighting fixture designed for precise and controlled illumination of facades, walls, and architectural elements. The addition of a lens enhances light distribution, providing focused or wide-angle lighting depending on the beam angle selection.

Precision lens optics

Enhances light control, minimizing glare while improving uniformity.

Architectural aesthetics

Sleek, modern, and minimalistic designs to complement buildings.

RGB/RGBW/Dynamic white

Adjustable color temperatures for different moods and applications.

Asymmetric & wall-washing effects

Ideal for highlighting textures and structures.

Customizable fixtures

Tailor-made shapes, sizes, and finishes to match project needs.

Life 50,000 burning hours

IP 66 rating

IK 08

Operating voltage options 24V DC/240V AC

CCT output 2700K-6500K, RGB, RGBW

Length available 1000mm, 600mm & 300mm

Control: DMX512 & ON-OFF

Bridges & monuments

Urban landscapes & public spaces

Building facades

Commercial & hospitality exteriors

Indiray plus linear wall washer

Sleek RGBW washer compact architectural lighting fixture designed for vibrant, customizable illumination of walls, facades, and landscapes. The light color variant allows for a wider color spectrum and the option of pure white lighting, making it perfect for both decorative and functional applications.

- Slim & stylish**
 Seamlessly integrates with modern architecture.
- Unmatched light control**
 Advanced lens optics ensure focused illumination, reducing light spillage and maximizing efficiency.
- RGB/RGBW/Dynamic white**
 Adjustable color temperatures for different moods and applications.
- Asymmetric & wall-washing effects**
 Ideal for highlighting textures and structures.
- Customizable fixtures**
 Tailor-made shapes, sizes, and finishes to match project needs.

- Life 50,000 burning hours
- IP 66 rating
- IK 08
- Operating voltage options 24V DC/240V AC
- CCT output 2700K-6500K, RGB, RGBW
- Length available 1000mm, 600mm & 300mm
- Control: DMX512 & ON-OFF
- Bridges & monuments
- Urban landscapes & public spaces
- Building facades
- Commercial & hospitality exteriors

Indiray soft linear wall washer

It is an architectural lighting fixture designed to provide soft, uniform illumination by reducing glare and hot spots. The diffuser helps distribute light more evenly across the surface, making it ideal for applications where a smooth lighting effect is desired.

Premium diffuser technology

Eliminates hotspots and ensures smooth, even lighting.

Glare-free & comfortable illumination

Perfect for creating a sophisticated ambiance.

RGB/RGBW/Dynamic white

Adjustable color temperatures for different moods and applications.

Continuous linear connectivity

Provides uninterrupted lighting for a seamless effect.

Customizable fixtures

Tailor-made shapes, sizes, and finishes to match project needs.

Life 50,000 burning hours

IP 66 rating

IK 08

Operating voltage options 24V DC/240V AC

CCT output 2700K-6500K, RGB, RGBW

Length available 1000mm, 600mm & 300mm

Control: DMX512 & ON-OFF

Bridges & monuments

Urban landscapes & public spaces

Building facades

Commercial & hospitality exteriors

Indiray focus light

(Narrow beam wall washer & spotlights)

A focus light refers to a lighting fixture designed to project a concentrated, directional beam onto a specific area or object. This can be achieved using narrow beam linear wall washers, spotlights, or floodlights with adjustable optics.

Ultra-precise beam control

Narrow beam angles (5°–40°) for targeted illumination.

Superior optical performance

Wall-washing & grazing effects with anti-glare technology.

High luminous efficacy

Delivers exceptional brightness with low power consumption.

Asymmetric & collimated lens options

Minimize light spill for optimized performance.

High-output wall-washing & grazing effects

Enhance textures & architectural depth.

Life 50,000 burning hours

IP 66 rating

IK 08

Operating voltage options 24V DC/240V AC

CCT output 2700K–6500K, RGB, RGBW

Available in wide beam & narrow beam

Control: DMX512 & ON-OFF

Indiray round flood light

Powerful & wide-angle illumination

A round flood light is a high-intensity lighting fixture designed to provide broad and uniform illumination over large areas. These lights are commonly used for outdoor security, architectural lighting, landscapes, and sports fields.

- 
Modern, slim housing
 Blends seamlessly with any architectural design.
- 
Ultra-precise beam control
 Narrow beam angles (10°–45°) for targeted illumination.
- 
Adjustable 360° rotational bracket
 Precise aiming for optimized coverage.
- 
Asymmetric & collimated lens options
 Minimize light spill for optimized performance.
- 
High-output wall-washing & grazing effects
 Enhance textures & architectural depth.

Indiray modular flood light

Customizable high-performance lighting

A modular flood light is an excellent choice for facade lighting, offering high brightness, flexibility, and energy efficiency. The modular design allows for custom wattage, beam angles, and configurations, making it perfect for highlighting architectural details on buildings, monuments, and landmarks.

Compact, modern housing

Sleek aesthetic to blend with various environments.

Multiple module configurations

Easily increase or decrease light intensity based on project needs.

Interchangeable optics (10°–120°)

Precision beam control for targeted or wide-area illumination.

Dark sky compliant

Minimizes light pollution without sacrificing visibility.

High-output wall-washing & grazing effects

Enhance textures & architectural depth.

Life 50,000 burning hours

IP 66 rating

Indiray spot facade light

Focused architectural illumination

An LED spot facade light is a narrow-beam, high-intensity lighting fixture used to highlight architectural details of building exteriors. Unlike wall washers, which provide broad illumination, spotlights focus light on specific elements such as columns, statues, logos, or textured surfaces.

Precision optics for focused illumination

Delivers sharp, controlled lighting to highlight specific architectural elements.

Glare-free, high-definition projection

Reduces light spill and enhances clarity with premium optical lenses.

Advanced asymmetric & symmetric optics

Tailored for different facade designs and lighting applications.

Corrosion-resistant aluminum housing

Powder-coated for longevity in urban and coastal environments.

Dark sky compliant

Minimizes light pollution without sacrificing visibility.

High-output wall-washing & grazing effects

Enhance textures & architectural depth.

Life 50,000 burning hours

IP 66 rating

Urban landscapes & public spaces

Facade up lighter

Enhancing architectural beauty

A facade up lighter is a powerful LED fixture designed to project light upward, emphasizing architectural features such as walls, columns, entrances, and textures. These lights are commonly used to create a dramatic and elegant nighttime appearance for buildings and landmarks.

Revolutionary optical technology

Upward light projection provides enhanced visibility and depth to building facades.

Multi-layer lens system

Enhances uniformity, reduces hotspots, and ensures seamless wall-washing.

Dark sky compliant

Minimizes light pollution without sacrificing visibility.

Glare-free, high-definition projection

Reduces light spill and enhances clarity with premium optical lenses.

Adjustable light spread

Dynamic focus control to switch between spot and flood modes.

Neon flex for facade lighting

Focused architectural illumination

Neon flex is a versatile, energy-efficient, and flexible LED lighting solution that mimics traditional neon tubes while offering better durability, safety, and customization. It's perfect for accentuating building facades, outlining structures, and creating vibrant signage.

Seamless, continuous lighting

Provides a smooth, uniform glow without visible LED dots.

Ultra-flexible & customizable design

Ideal for curved facades, lettering, and intricate designs.

Bendable & adaptable design

Perfect for curved facades, columns, arches, and unique architectural shapes.

Smooth & even light distribution

Eliminates dark spots and provides a seamless wash effect.

Custom lengths & shapes

Easily cut and adapted to meet specific project needs.

Life 50,000 burning hours

IP 66 rating

IK 08

Operating voltage options 24V DC/240V AC

Flexible wall washer

Adaptive & dynamic facade lighting

A flexible wall washer is a bendable LED lighting solution designed to provide smooth, uniform illumination on facades, curved surfaces, and irregular architectural elements. Unlike traditional rigid wall washers, flexible versions can contour around corners, curves, and uneven surfaces, making them ideal for modern, artistic, and unconventional lighting designs.

Revolutionary optical technology

Upward light projection Provides enhanced visibility and depth to building facades.

Multi-layer lens system

Enhances uniformity, reduces hotspots, and ensures seamless wall-washing.

Dark sky compliant

Minimizes light pollution without sacrificing visibility.

Glare-free, high-definition projection

Linear ground burial lights

Seamless in-ground architectural lighting

Linear ground burial lights, a cutting-edge in-ground lighting solution designed for seamless integration into urban and architectural environments. These lights offer a low-profile yet powerful illumination, creating striking visual effects while maintaining a clutter-free aesthetic.

Robust & durable construction

Ensures maximum protection and longevity.

Anti-slip & walkable surface

Safe for pedestrian and vehicular traffic.

RGB/RGBW/Dynamic white

Adjustable color temperatures for different moods and applications.

Modular design for continuous lighting

Connect multiple units effortlessly.

Glare-free, high-definition projection

Reduces light spill and enhances clarity with premium optical lenses.

Round ground burial lights

Durable & elegant in-ground illumination

Round ground burial lights are recessed LED fixtures designed to be installed flush with the ground, providing discreet yet powerful lighting for facades, pathways, landscapes, and architectural features. These lights offer 360° illumination, making them ideal for highlighting structures, creating guiding lights, or adding decorative accents to outdoor spaces.

Robust & durable construction

Ensures maximum protection and longevity.

Flush-mounted for seamless integration

Perfect for modern architectural designs.

Anti-slip & walkable surface

Safe for pedestrian and vehicular traffic.

Pedestrian & vehicle traffic compatible

Ideal for urban and landscape applications.

Control System & Accessories

STICK-CW4 DMX controller

RDM based DMX controller with 1024 channels NON upgradable. It's required Wi-Fi router to generate Wi-Fi for remote access through mobile app. It has two DMX Output of 3-pin & RJ45 connector. New glass design, Color palette, Touch sensitive buttons, Touch sensitive wheel.

- Number of scenes-36
- Number of zones-1
- Standalone memory-100k
- Memory capacity- Limited to used No. of steps and channels
- Power voltage-5-15V DC
- Power connector-Screw Term/RJ45 connector

SLESA-U10 DMX controller

RDM based DMX controller with 512 channels upgradable to 1024 channel. It has inbuilt Wi-Fi for remote access through mobile app. It has Two DMX output of XLR3

- Number of scenes-99
- Number of zones-1
- Standalone memory-100k
- Memory capacity- Limited to used No. of steps and channels
- Power voltage-5-5.5V DC
- Power connector-USB Type-C

SLESA-U11 DMX controller

RDM based DMX controller with 1024 channels upgradable to 2048 channel. And it has 5 zones, 10 Buttons to direct access of Scenes. It's required Wi-Fi router to generate Wi-Fi for remote access through mobile app. It has Four DMX output of XLR3

- Number of scenes-99
- Number of zones-5
- Memory Capacity- Micro SD card up to 4 GB
- Power voltage-5-5.5V DC
- Power connector-USB Type-C

DINA-SR1 DMX controller

RDM based DMX controller with 3072 channels upgradable to 6144 Channel. And it has 20 zones, Its has DALI, Artnet, eDMX, PIXEL O/P. It's required Wi-Fi router to generate Wi-Fi for remote access through mobile app. It has 6 DMX Output of XLR3 & 3.5mm mini Jack for audio. Cloud compatible. Home automation can be done.

- Number of scenes-2000
- Number of zones-20
- Memory Capacity- 16MB Inbuilt & Micro SD card up to 4 GB
- Power voltage-8-15V DC
- Power connector-USB

DINA-DR1 DMX controller

RDM based DMX controller with 3072 channels upgradable to 6144 Channel. and it has 20 zones, Its has Relay, DALI, Artnet, eDMX, PIXEL O/P. It's required Wi-Fi router to generate Wi-Fi for remote access through mobile app. It has 6 DMX, 1 audio, 2 pixel, 2 DALI Output of screw connector. cloud compatible. Home automation can be done.

- Number of scenes-2000
- Number of zones-20
- Memory Capacity- 16MB Inbuilt & Micro SD card up to 4 GB
- Power voltage-8-15V DC
- Power connector-Screw Terminal

DMX Splitter

- DMX Splitters amplify the incoming DMX signal to ensure consistent strength and reliability across multiple outputs, even over long cable runs.
- Our DMX Splitters feature several output ports e.g. 2,4,6,8 etc, allowing you to connect multiple devices.
- Its provides optical isolation for DMX signal, reducing risk of interference and ensuring clean signal transmission.
- All systems of auto pilot work with 5/12 volt dc or 240V AC supply.
- Dmx data output by 3 pin Female XLR set.

Accessories used in Facade Lighting Installation

3 Pin XLR Connector

Male-Female Connector

IP68 Y- Connector

IP68 T- Connector

Single Pair Shielded DMX Cable

IP68 I- Connector

Waterproof GEL Connector
